Mehmet Çakar

3D Environment & Prop Artist

Konya, Türkiye · Open to remote work | mehmetcakarrrr42@gmail.com
Portfolio: cakar1125.github.io | linkedin.com/in/mehmet-çakar-546567343 | artstation.com/mehmetcakar

SUMMARY

3D environment and prop artist creating game-ready realistic, semi-realistic and stylized assets. Experienced across the full asset pipeline: modeling in Blender and ZBrush, PBR texturing in Substance Painter and integration into Unity. Has built modular building kits and city environments. Open to remote roles and to positions in Konya.

EXPERIENCE

3D Environment Artist
Nov 2025 – Present
ChronoKrit · Konya

- Model environments and props for games in development, in realistic, semi-realistic and stylized styles.
- Prepare assets for the engine: optimization, UVs and texturing, Unity integration.

3D Artist
Mar 2025 – Oct 2025
Blazit Game · Remote

- Created 3D models and game-ready assets for production.
- Built a reusable modular city and environment kit used across scenes.
- Handled asset export and Unity integration.

3D Artist & Independent Developer
2025
Personal game project

- Produced all 3D art and assets for a personal game project (unreleased).

SELECTED PROJECTS

All projects with turnarounds and wireframes: cakar1125.github.io

- **Modular City Building Kit** — 100+ modular pieces in six architectural styles, assembled into 29 buildings in Unity (mafia-themed city game).
- **City Props and Landmarks** — 57 game-ready models: lab equipment, club furniture, street props and buildings such as a bank, police headquarters and hospital (some made with the team).
- **Mechanic Workshop Tool Set** — A workbench and 17 realistic, game-ready tools.
- **Egyptian Treasure Props** — 23 stylized prop sets for an adventure game (7 made with the team).
- **Interiors** — Shark Home hideout and an archaeologist's trailer: modeling, texturing and scene assembly.

SKILLS

Software: Blender, ZBrush, Substance Painter, Unity, Unreal Engine

Expertise: Environment and prop modeling; realistic, semi-realistic and stylized styles; modular environment kits; UV unwrapping and PBR texturing; game-ready asset optimization; Unity integration and scene assembly

LANGUAGES

Turkish: Native

English: Comfortable in written communication; basic spoken

EDUCATION

Mechanical Engineering — coursework, not completed
